Main Body

ELAP Labs Certified for Lead

Exposure to high levels of lead results in neurological problems, especially in children. A laboratory may be certified for lead analysis in all categories; Drinking Water, Non-Potable Water, Solid and Hazardous Waste, including paint chips and dust wipes and Air and Emissions. Environmental laboratories do not analyze samples/specimens from the human body. Analysis of blood for the testing of elevated lead levels must be performed by a clinical laboratory licensed by the department's Clinical Laboratory Evaluation Program (CLEP).
